

Darlington Daniel

Profile

I have maintained a high honor status throughout my degree program. Peculiar strengths in Programming languages like JavaScript and Java, and experience working with SQL and databases, also a huge interest in learning others along the way (currently learning Python). I am fully capable of working in a team, as well as alone. At the moment, I am developing a mobile applications using Augmented Reality as my Capstone Project. I also have a business as a Freelance Web Developer. This helps me to keep my skills sharp and gives much needed experience of working on real life projects. I have a practical knowledge of Software Development using Agile Methodologies and Practices.

I actually have quite a rich employment history as I have always had an incredibly high work ethic, unfortunately most of those jobs are not relevant to my field of study. There is however one that is worth a mention.

Employment History

Jan 2016 – Dec 2017

Famagusta, North
Cyprus

Manager at Wimpy Restaurant

Although irrelevant to my career, my time spent at this job helped test, as well as improve my leadership skills. I had the opportunity to learn how to deal with employees who each had unique strengths and weaknesses.

The effect of my leadership led to the company improving its online presence by creating a Facebook Page, as well as getting the shop listed on other online ordering websites. As a direct result, sales improved as customer ease of access increased with multiple ordering options.

With a keen attention to detail, I optimized the Restaurant's overall performance by simplifying some repetitive tasks and assigning the right duties, while ensuring high employee morale by rewarding good performance and providing suitable work schedules.

Education

Sep 2018 – Feb 2021

Lefkosa, North Cyprus
